

The Action and Cognition Laboratory at North Dakota State University is seeking a Postdoctoral Fellow to collaborate on an NSF-funded project examining visual processing in peripersonal space under the direction of Dr. Laura E. Thomas.

Applications are encouraged from individuals with interests in visual cognition, action, perception, and/or embodied cognition. Applicants must have a Ph.D. in cognitive psychology, cognitive science, or a related discipline, show evidence of research productivity in the form of peer-reviewed publications, and demonstrate effective oral and written communication skills. Proficiency working with Matlab Psychophysics Toolbox and experience with eyetracking research are a plus, but not a requirement.

The start date for the fellowship is flexible, but all applicants should be free to begin work in the lab no later than September 1, 2017. Initial appointment is for one year with the possibility of renewal. Salary and benefits are competitive. The successful applicant will join a vibrant community of researchers at NDSU's Center for Visual and Cognitive Neuroscience: <https://www.ndsu.edu/centers/cvcn/> , which houses shared facilities for fNIRS, immersive virtual reality, and a driving simulator. More information about the Action and Cognition Lab can be found at the lab's website: <https://www.ndsu.edu/centers/cvcn/labs/thomas/>. Informal inquiries regarding this fellowship can be addressed to Dr. Laura E. Thomas at laura.e.thomas@ndsu.edu

Apply online at <https://jobs.ndsu.edu/postings/8132> to upload a curriculum vitae, short research statement, representative publication(s), and provide contact information for three references. Review of applications will begin immediately and continue until the position is filled.

North Dakota State University is an equal opportunity employer and all qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, age, disability or veteran status. Applications from women and scholars from traditionally underrepresented groups are encouraged.
